

**Tor and Deep Web, Dark Web**

noz:lla

# WHAT IS THE DARK WEB?

An illustration of an iceberg floating in a blue ocean. The tip of the iceberg is above the water line, while the much larger base is submerged. Three white circles with lines pointing to text boxes are located on the iceberg: one on the tip, one on the submerged part, and one near the bottom. The background is a gradient of blue.

## World Wide Web

Only 4% of the content on the internet is www., which includes public websites such as Google, eBay, etc.

## Deep Web

Over 90% of the information on the internet is in the deep web and is not accessible by surface web crawlers. However, it doesn't mean that they're dark web areas – they're just one layer removed from the public web that's searchable through search engines.

## Dark Web

The dark web consists of websites that use public internet, but require specific software for access and is not indexed by search engines to ensure anonymity. The stolen data is traded, sold and used for financial, political or personal gain.
